Associated Students of the Graduate Division

The Associated Students of the Graduate Division (ASGD) is the officially recognized student government of graduate students at UC San Francisco. ASGD functions to create a sense of community among graduate students; to represent the needs of the diverse body of graduate students and to advocate for their rights and interests; and to promote career and professional development for graduate students.

ASGD holds monthly meetings to discuss issues that affect graduate students and develops plans to address these issues. The group sponsors a variety of events and activities throughout the academic year at both the Mission Bay and Parnassus campuses that promote inter-program networking, collaboration, and career development. ASGD also provides financial support to graduate students to attend conferences and allocates funding to registered campus organizations for their student-centered activities as well.

Students enrolled in the following PhD and master's programs associated with the Graduate Division are members of ASGD and should take advantage of the services the group offers:

- Biochemistry and Molecular Biology (TETRAD)
- Biophysics
- Cell Biology (TETRAD)
- Chemistry and Chemical Biology
- Developmental and Stem Cell Biology
- Epidemiology and Translational Science
- Genetics (TETRAD)
- Global Health Sciences
- Medical Anthropology
- Medical Informatics
- Neurosciences
- Oral and Craniofacial Sciences
- Pharmaceutical Sciences and Pharmacogenomics
- Rehabilitation Science
- Sociology
- Translational Medicine
- Nursing (PhD degree program only)

Note that students in the Nursing MEPN and MS programs and Physical Therapy programs (also offered by the Graduate Division) are represented by the Associated Students of the School of Nursing and the Associated Students of Physical Therapy, respectively. ALL students at UCSF are also represented by the Graduate and Professional Students' Association (GPSA). Read an article about recent changes in student government at UCSF.
